Front-End Developer

FRONT-END DEVELOPMENT | RESPONSIVE WEB DESIGN | UI DEVELOPMENT

HTML5 | CSS3 | JavaScript | React JS | Bootstrap | Tailwind CSS

Entry-level Front-End Developer and BS Information Technology student with hands-on experience building responsive, user-focused web interfaces using HTML5, CSS3, JavaScript, React JS, Bootstrap, and Tailwind CSS. Understands mobile-first design, reusable UI components, DOM-based interactivity, clean code, debugging, and cross-browser usability. Quick learner who translates requirements into accessible, visually consistent interfaces and contributes effectively in collaborative environments.

SELECTED HIGHLIGHTS

Creates responsive, mobile-friendly web layouts with clear visual hierarchy and consistent styling

Builds reusable interface components using HTML5, CSS3, JavaScript, and React fundamentals

Uses Bootstrap and Tailwind CSS to accelerate development and maintain design consistency

CORE COMPETENCIES

EXPERIENCE

FRONT-END DEVELOPER - PERSONAL & ACADEMIC PROJECTS | Project-Based Experience

Designed and developed responsive web pages using semantic HTML5, CSS3, and JavaScript, adapting layouts for desktop, tablet, and mobile screens

Created reusable UI sections and interface components with consistent typography, spacing, navigation, forms, buttons, and content layouts

Implemented interactive page behaviour through JavaScript and DOM manipulation, including event handling and dynamic content updates

Applied CSS Flexbox, Grid, Bootstrap, and Tailwind CSS to produce structured layouts and speed up responsive interface development

Practised React fundamentals by breaking interfaces into reusable components and working with component structure, props, and state concepts

Reviewed and refined frontend code for readability, visual consistency, browser compatibility, and basic accessibility

Used an iterative build-test-debug approach to identify layout and functionality issues and improve the overall user experience

PROJECT WORK

RESPONSIVE WEB INTERFACE BUILDS | HTML5, CSS3, JavaScript, Bootstrap, Tailwind CSS

Structured multi-section pages with semantic markup, responsive navigation, forms, content cards, and reusable visual patterns

Optimised layouts with media queries, Flexbox, and Grid to maintain readability and usability across common screen sizes

REACT UI COMPONENT PRACTICE | Component-Based Front-End Development

Converted interface sections into modular React components and explored props and state concepts for reusable, maintainable UI development

Tested and adjusted component styling and interactions to improve consistency, responsiveness, and user experience

EDUCATION

Bahauddin Zakariya University, Sub-Campus Lodhran - Bachelor's in Information Technology (BS IT) (2022-2026)

Ali Garh School and College, Kahroor Pacca, Pakistan - FSc Pre-Engineering (2020-2022)
